DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed March 16, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The Applicant has provided no copy of the Japanese document.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 – 13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 10 – 13 and 28 – 36 of U.S. Patent No. 6,323,543. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

Claims 1 –12 of the instant application has language that is nearly identical to claims 10 – 13 and 28 – 36 of the patent. The minor differences in the language do not amount to a departure from the patented invention. Claim 10 of the application requires a plurality of electronic devices, while claim 33 of the patent requires at least one electronic device. The language “at least one” implies that there can be a plurality of devices, or more than one.
